

Lift Station Monitoring & Control

Reliable & Cost-Effective
Distributed Control Systems

Simple

Easily operated & maintained by utility personnel with training provided. Mobile access delivers quick & easy status diagnosis.

Reliable

Radio frequency-based communication networks guarantee secure & reliable coverage of critical systems when they are needed most.

Turnkey + Scalable

Scalable solutions deliver the lowest cost of ownership. End-to-end SCADA system reduces risk & is ready to run out of the box.

Expandable + Compatible

Built for longevity & to resist obsolescence, systems are expandable & backwards compatible, accommodating system evolution.

Response + Updates

Remote service response is available 24/7/365, with software & firmware updates are free for the life of the system.

Warranty Protection

Industry-leading lightning warranty provides financial protection & peace of mind.

COMPLETE SCADA SYSTEM

Telemetry Control Unit (TCU800)

An automatic lift station pump controller that supports the operation of up to 3 pumps using level input from floats &/or pressure transducers.

HyperTAC HMI Software + Hyper SCADA Server

Browser-based graphical user interface with statuses, historical data, reports & trending.

200 Series Remote Terminal Unit (RTU)

Modular “building block” architecture using a passive backplane that provides power, communications, I/O & a PLC.

Multiple Communication Methods

Secure & reliable radio, cellular & network communication.

SMARTCOVER[®]
A Badger Meter[®] Brand

PATENTED & PROPRIETARY TECHNOLOGY

Provides Energy Optimization

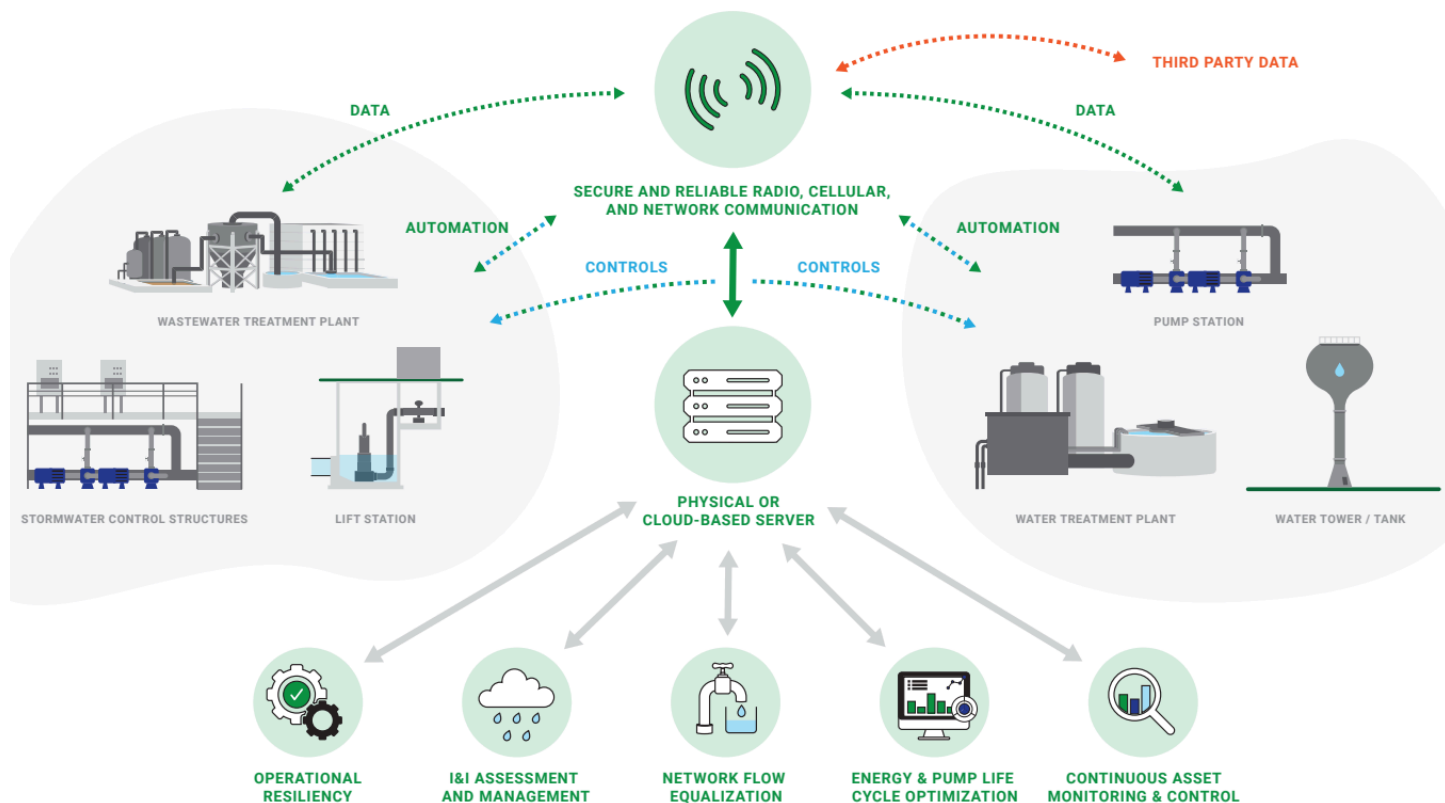

Our Lift Station Monitoring solutions are recognized as an industry leader, providing remote monitoring & control for water, wastewater & stormwater utilities.

Utilizing an end-to-end approach from design to implementation, we deliver reliable & cost-effective distributed control systems for utilities of any size.
