

SmartInsights™

Monthly Summary of Data Collection & Key Takeaways

HOW IT WORKS

Alarms that occurred during the month are displayed on a map view to easily see where your hot spots are. All of your sensor locations are listed below the map, sorted by number of alarms & linked to your charts so that you can easily click through to investigate further.

Alarm trends over time for the past 12 months & the number of active locations provide insight into trends over time in your system.

Summary sections for Capacity, SmartFLOE & H2S break down information further to show hotspots of capacity issues, FLOE & H2S for the month. Quickly see which locations are potentially causing problems & address issues sooner.

Schematic diagrams of manholes display the maximum & average level this month relative to the depth of the manhole, position of SmartCover sensor & current High Alarm settings. Easily identify which manholes had the highest water levels & assess whether any of your High Alarm thresholds should be adjusted or turned on at locations with alarm notifications currently disabled.

INSIGHTS & TAKEAWAYS

Monthly SmartInsights deliver a summary of how your system is performing as a whole. Key takeaways at the beginning of the report showcase the most important summary statistics from the month. Each month, you will see the number of potential spills saved by your SmartCover system & a comparison to the previous month. In addition, you will receive high-level takeaways for your SmartFLOE & H2S applications. Where was FLOE the highest this month? How many H2S sensors exceed their high alarm threshold? Answer this—and much more—with Monthly SmartInsights!

SMARTCOVER Monthly SmartInsights™

System Performance Report for Penumbra Test Water District
April 1, 2024 - April 30, 2024

KEY TAKEAWAYS

POTENTIAL SPILLS SAVED

161

We notified you of 161 High Level Alarms this month.

↓ 15 fewer than last month

HIGHEST DAILY SmartFLOE™

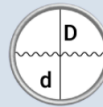

4.7

million gallons

"271 North Main St Flow" had the highest daily SmartFLOE.

↑ 0.2 MGD higher than last month

MAX CHANNEL LEVEL (d/D)

100%

8 locations tied for highest d/D value.

→ Same as last month

H2Scents®

10

locations

Exceeded the High Alarm threshold.

↑ 1 more than last month
