

# Sewer Monitoring

Real-Time Remote Monitoring  
of Collection Systems Infrastructure

## Trusted Utility Partner

Protecting public health & the environment for nearly 20 years while optimizing investments & strengthening utility resiliency.

## Industry-Leading Connectivity

Satellite communication delivers constant system visibility. Alarms & notifications provide advanced notice to prepare & respond.

## Integrated + Accessible

Available API fully integrates multiple systems & mobile app produces insights directly from your system in real-time.

## Actionable Insights

Industry-leading analytics via an intuitive dashboard. Easy access to critical events & visibility into sensor status & location.

## Improved Efficiency + Safety

No confined space entry reduces field resources & safety hazards. Resource allocation based on need to maximize coverage.

## EFFICIENT MANAGEMENT OF REAL-TIME DATA

Our remote monitoring & controls for sewer & stormwater infrastructure enable utilities to:

**Prevent Sanitary Sewer  
Overflows (SSOs)**

**Optimize Collection System  
Cleaning**

**Accurately Identify Inflow &  
Infiltration (I&I)**

**Track & Monitor H2S Odors**

**Monitor Combined Sewer  
Overflows (CSOs)**

**Efficiently Operate Pump  
Stations**

Real-Time Remote Monitoring of Collection Systems Infrastructure

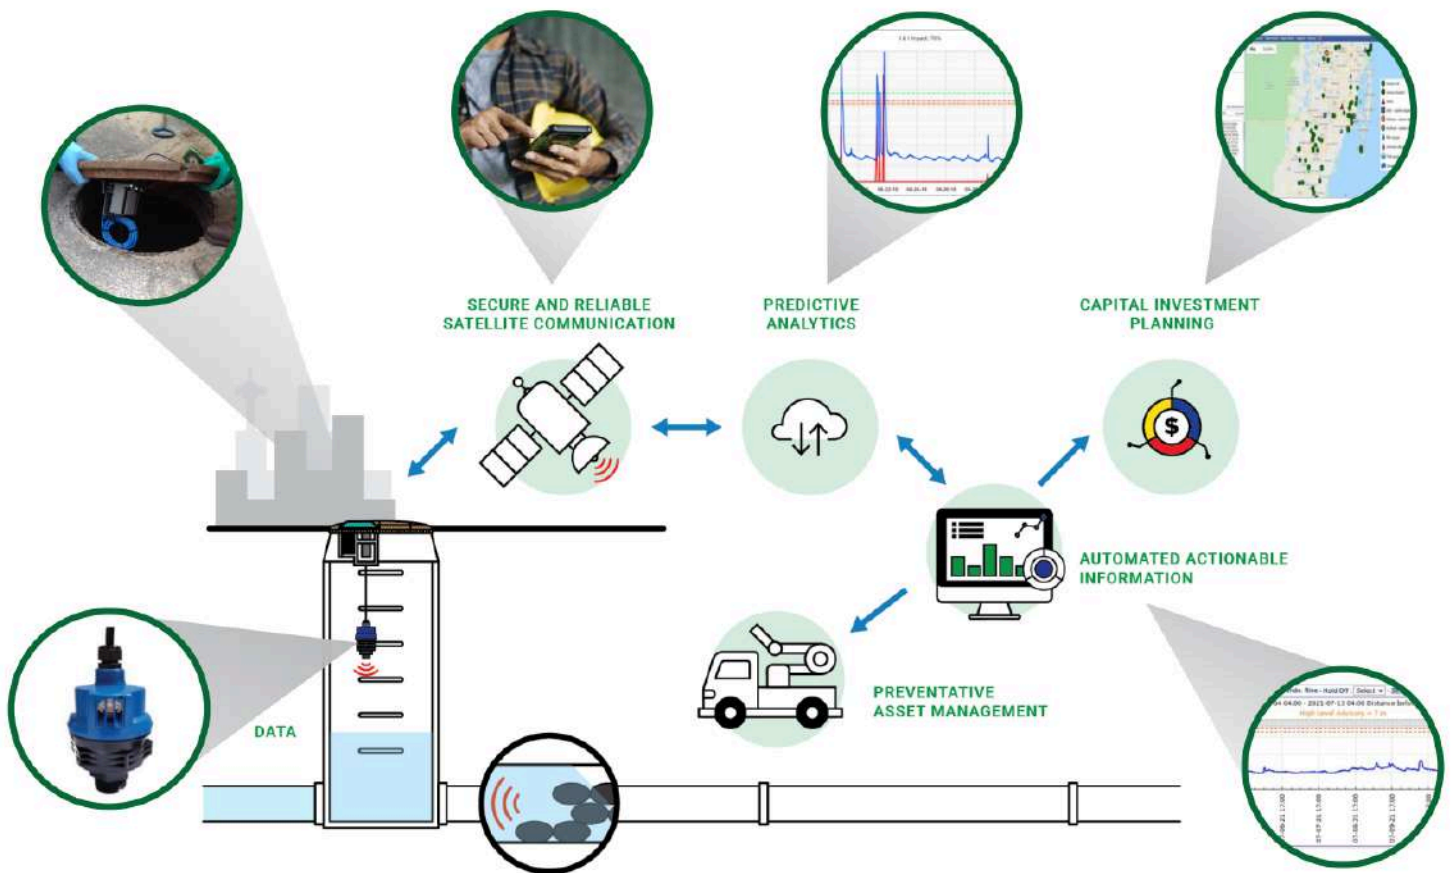

## INTEGRATED SOLUTION

*Greater Visibility into Operations*

By delivering all of the components needed (hardware, software & analytics), we can ensure success.

Our solutions allow users to convert reliable & accurate data into actionable outcomes enhancing performance, reducing costs & maximizing resources.

Delivers All Components to Ensure Success
